SUMMARY

Information Technology student at Universitas Brawijaya with interests in web development, data analysis, and UI/UX design. Experienced in academic projects and collaborative environments that have strengthened communication, problem-solving, time management, and analytical thinking skills. A proactive, adaptable, and growth-oriented individual committed to contributing to effective, innovative, and user-centered digital solutions.

EDUCATION

Diploma in Information Technology | 2024 – Present

Faculty of Vocational Studies, Universitas Brawijaya

- Relevant coursework in Web Development, Database Management, UI/UX Design, and Data Analysis.

PROFESSIONAL EXPERIENCE

Student Executive Board (BEM)

Aug 2025 - Dec 2026

Faculty of Vocational Studies | Universitas Brawijaya

Awarded Best Intern Staff for demonstrating exceptional dedication, active participation, and valuable contributions to initiatives within the Ministry of Social and Community Affairs. Contributed to the planning and execution of social programs while strengthening teamwork, communication, and organizational management skills.

COMMITE EXPERIENCE

Head Coordinator of Logistics Division | Abdi Desa

Oct 2025 - Nov 2025

Student Executive Board (BEM), Faculty of Vocational Studies, Universitas Brawijaya

Led the logistics division for one of the largest community service programs organized by BEM Faculty of Vocational Studies 2025. Coordinated operational and equipment management to support educational activities, community outreach, village product development, cultural performances, and collaborative programs with local residents.

Staff of Logistics Division | PKKMB, Krida Mahasiswa & Open House

Aug 2025 - Nov 2025

Student Executive Board (BEM), Faculty of Vocational Studies, Universitas Brawijaya

Supported logistics planning and operational preparation for major faculty programs, including PKKMB, Krida Mahasiswa, and Open House 2025. Managed equipment coordination, venue preparation, and resource distribution to ensure effective event execution.

Staff of Logistics Division | Vokasi Mengajar

Sep 2025

Student Executive Board (BEM), Faculty of Vocational Studies, Universitas Brawijaya

Contributed to one of BEM's educational and community engagement programs through seminar activities, collaborative learning sessions, and safety awareness education for elementary school students. Assisted in logistics coordination and program implementation.

Information Technology Student Association (HMPSTI), Universitas Brawijaya

Supported participant health and safety management during the Information Technology departmental orientation program. Assisted in monitoring participant well-being and coordinating health-related needs to maintain a safe and organized event environment.

SKILLS

Programming & Development : HTML, CSS, JavaScript, Java, Web Development

Design & Analysis : UI/UX Design, Figma, Data Analysis

Database & Tools : MySQL, phpMyAdmin, Database Management, XAMPP

Professional Skills : Problem Solving, Communication, Teamwork, Time Management, Adaptability

PROJECTS

IoT - Smart Aquaculture Monitoring and Automatic Water Management System

Developed an Internet of Things-based system to monitor fish pond water level and water quality in real-time. Sensor data is sent to a server and visualized through a web dashboard for remote and efficient monitoring.

Tech Stack : ESP32, IoT Sensors, PHP, MySQL, Web Dashboard (HTML, CSS, Laravel)

Wonosari Tea Website (Laravel Project)

Developed a web-based information system for Wonosari Tea Plantation using Laravel framework. The system provides structured information display and dynamic content management.

Tech Stack : Laravel, PHP, MySQL, HTML, CSS, JavaScript

TanganKita – Volunteer & Community Platform Website

Developed a web-based platform for managing volunteer and community activities, allowing users to browse, register, and manage events online.

Tech Stack : HTML, CSS, PHP, MySQL, XAMPP

EventKuy – Event Ticket Booking Application (Java GUI)

Built a desktop application for event ticket booking with event and user data management using a database system.

Tech Stack : Java (Swing/GUI), MySQL, NetBeans/Eclipse
